**Kansans for Life Decries Hypocrisy of Legislators
Who Voted Not to Override Governor Kelly's Veto of SB 67**

Statement by KFL Executive Director, Mary Kay Culp:

"The failure of the House to override Kansas Governor Laura Kelly's veto of SB 67, the Abortion Pill Reversal (APR) Notification bill, is a tragedy for women and their unborn babies.

"Despite the fact that the APR Notification bill did not become law, the practice of abortion reversal itself will continue in the state of Kansas where there are at least 15 providers. The travesty is that now many women won't find out about it in time to save their babies.

"It is ironic that abortion proponents who professed concern about using the pregnancy saving hormone Progesterone off-label, did not express concern over using the Mifepristone abortion drug off-label for 16 years, nor did they ever voice objections to the off-label use of the poison Digoxin, used for decades in Kansas' voluminous late-term abortion industry.

"We do very much appreciate the 83 state representatives who voted to override the governor's veto and the 27 state senators who did the same.

"Today's vote does not affect the timing of Kansans for Life's plan to amend the state's constitution. We have always said that we plan to act very strategically and take the time necessary to guarantee success, and we will be making announcements on that vitally important subject as warranted."
