

# HOW BIG IS BABY?

# COLOR AND LEARN

# Baby's First 3 Months

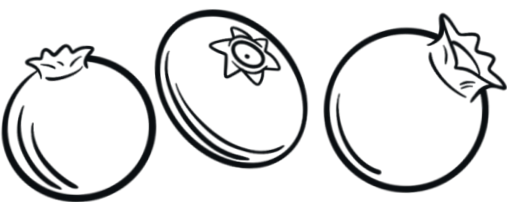

First Trimester

## 5 Weeks:

Size: Poppyseed

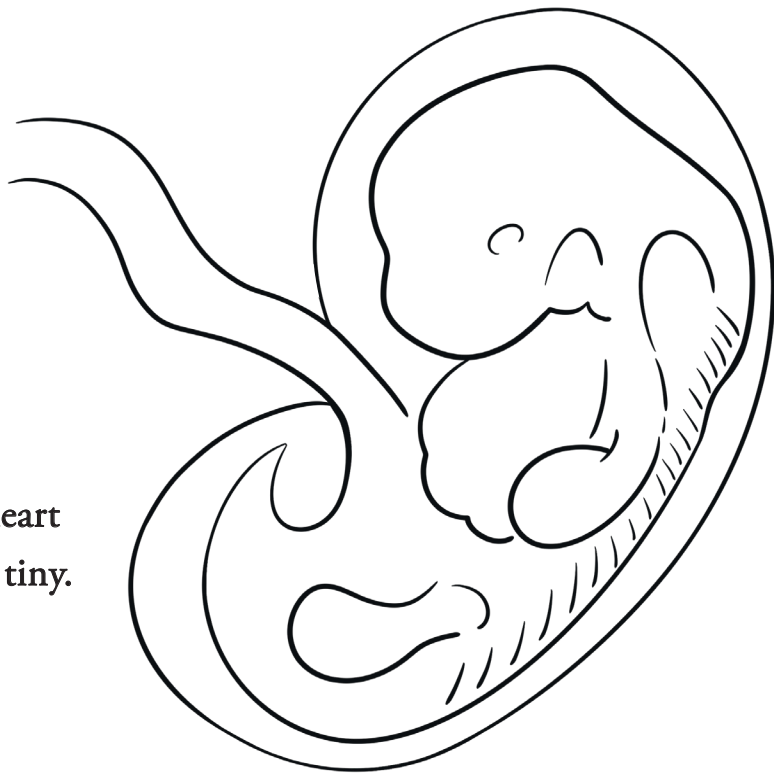

Baby is growing every day. The cells that will become his brain, heart and lungs are starting to form.

## 7 Weeks:

Size: Blueberry

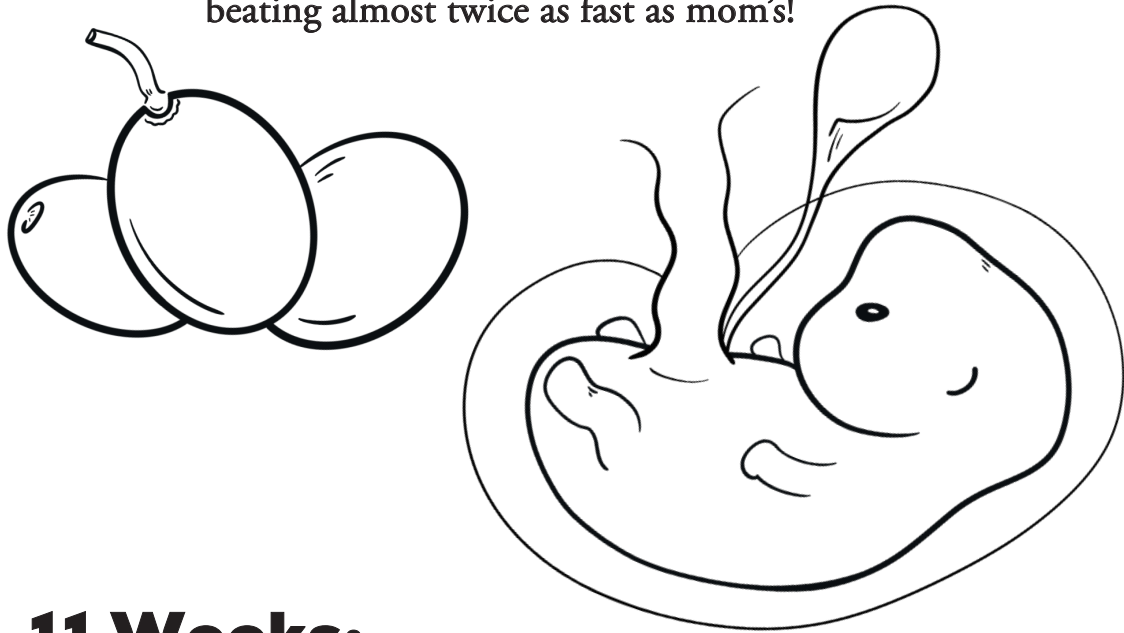

Baby's arms and legs are budding. Her heart started beating last week. She is still very tiny.

## 9 Weeks:

Size: Grape

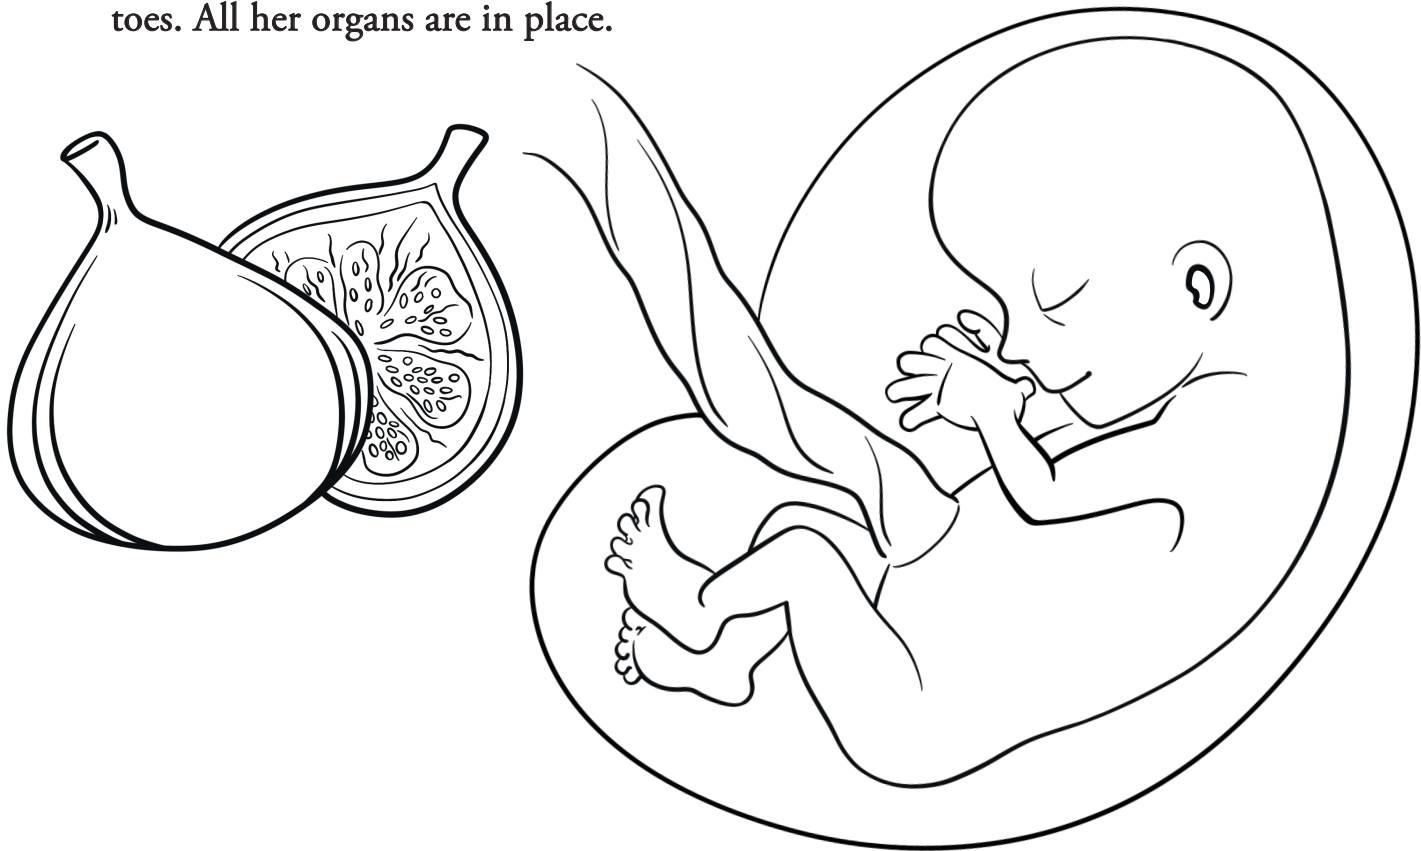

Baby now has knees and elbows. His heart is beating almost twice as fast as mom's!

## 11 Weeks:

Size: Fig

Baby likes to move but is still too small for mom to feel. She now has fingers and toes. All her organs are in place.

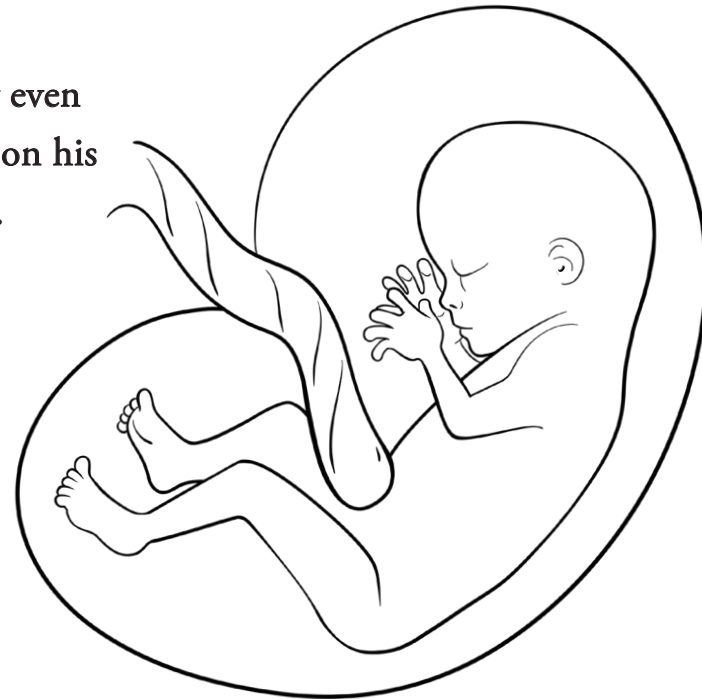

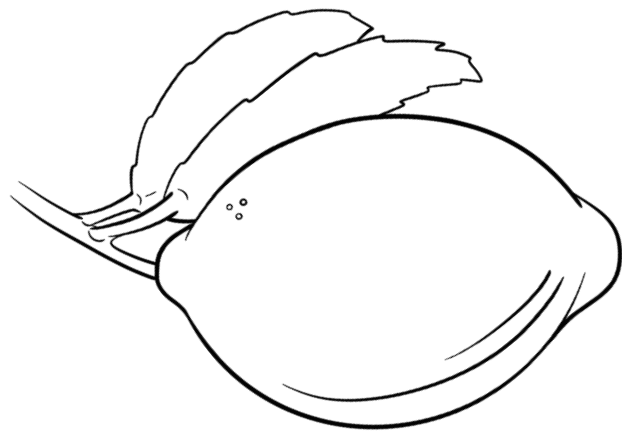

# Months 4-6

Second Trimester

## 14 Weeks:

Size: Lemon

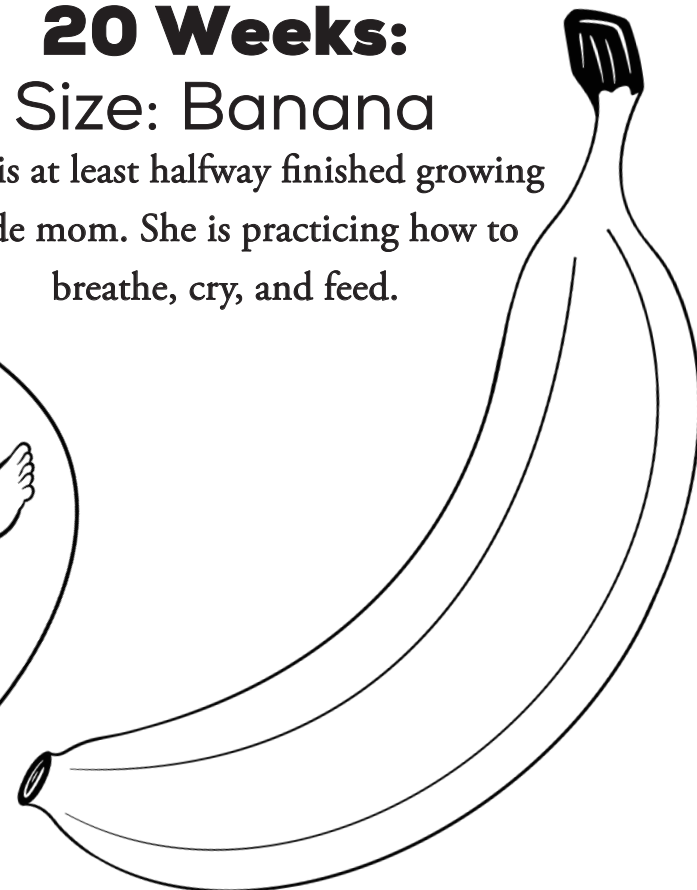

Baby will touch his own face and may even try to reach his twin. He has tastebuds on his tongue. Mom can feel him move.

## 20 Weeks:

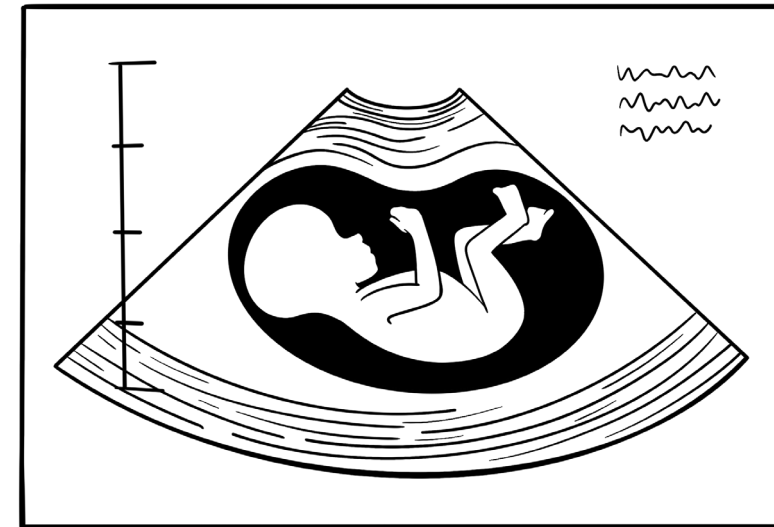

Size: Banana

Baby is at least halfway finished growing inside mom. She is practicing how to breathe, cry, and feed.

## Time for an Ultrasound

Around 18-22 weeks, it is time to check how Baby is growing. An ultrasound uses sound waves to make a picture of Baby.

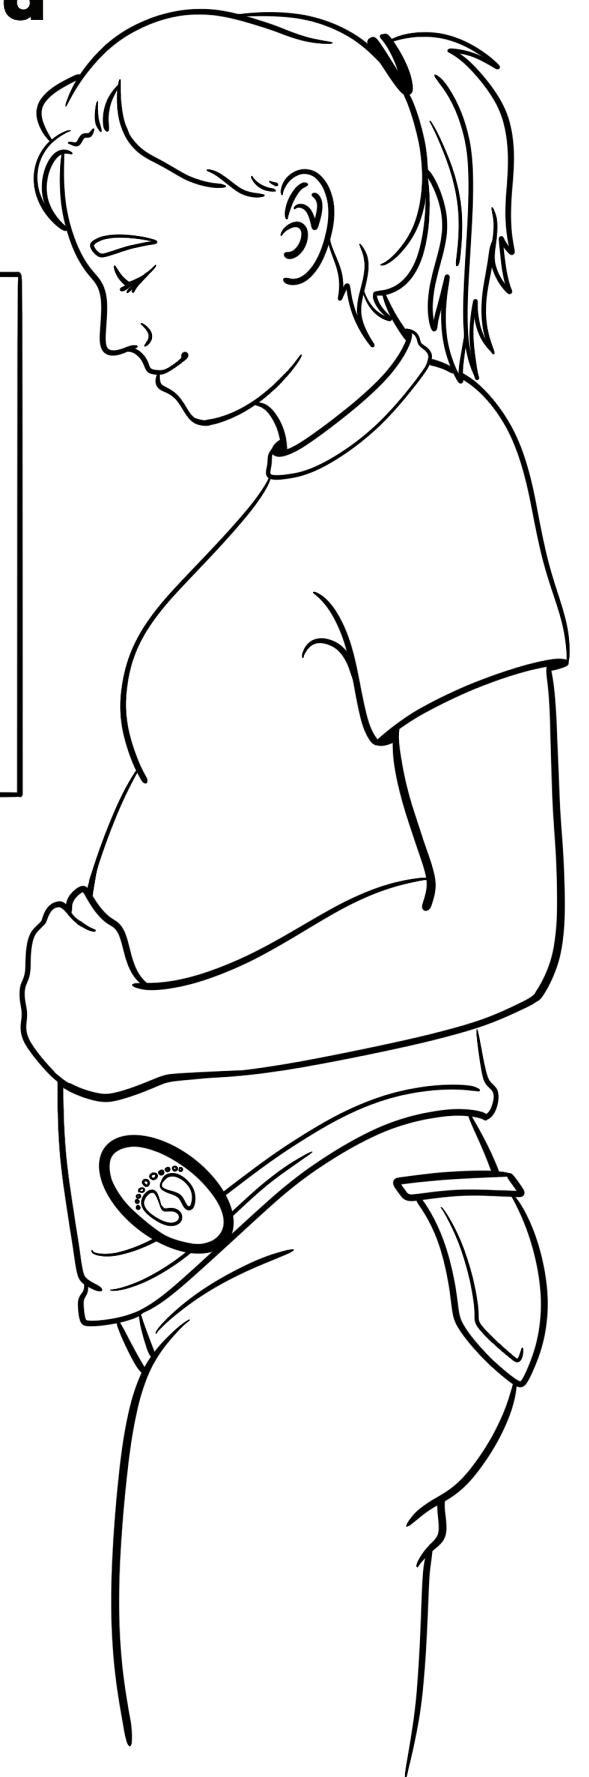

An ultrasound can also help moms and dads find out if their baby is a boy or girl.

Boy?

Girl?

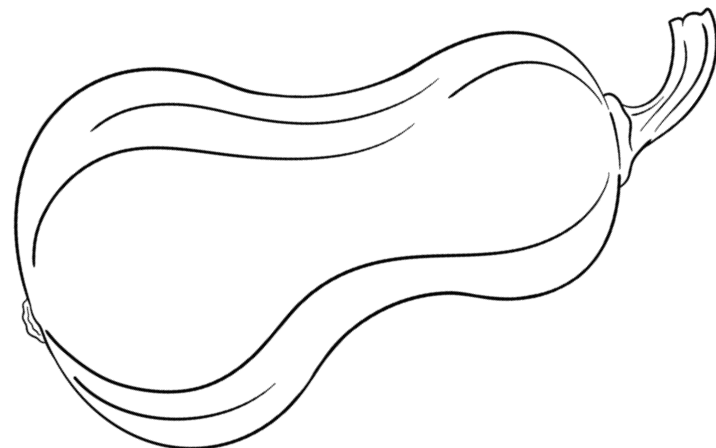

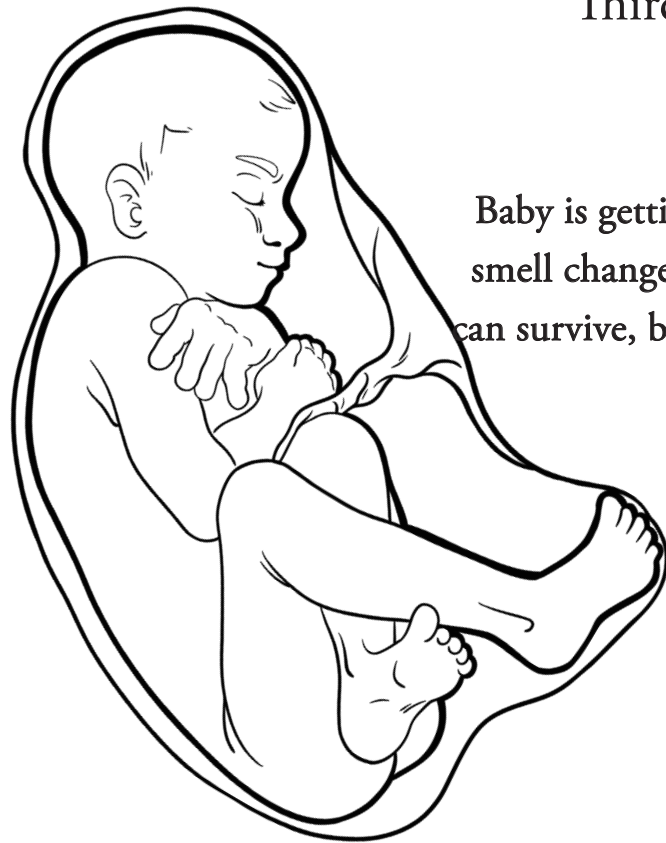

# Months 7-9

Third Trimester

## 28 Weeks:

Size: Squash

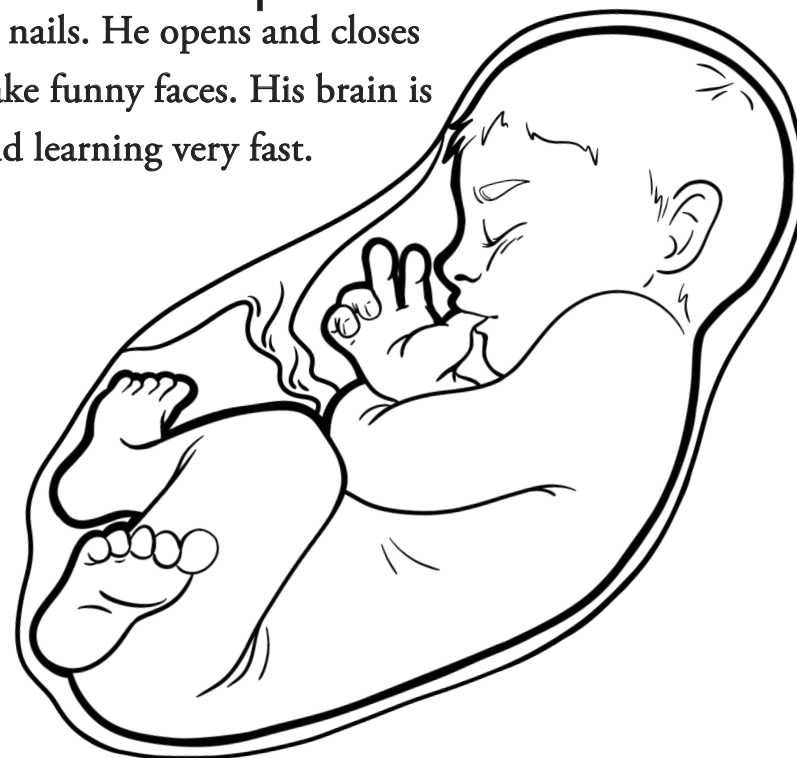

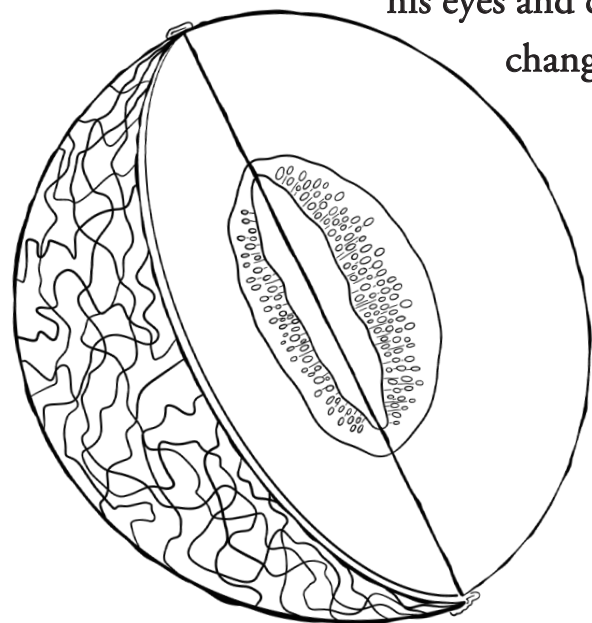

Baby is getting stronger each day, gaining weight, and can smell changes inside of mom. Most babies born at this age can survive, but those born as early as 22 weeks can live with the help of doctors and nurses.

## 34 Weeks:

Size: Cantaloupe

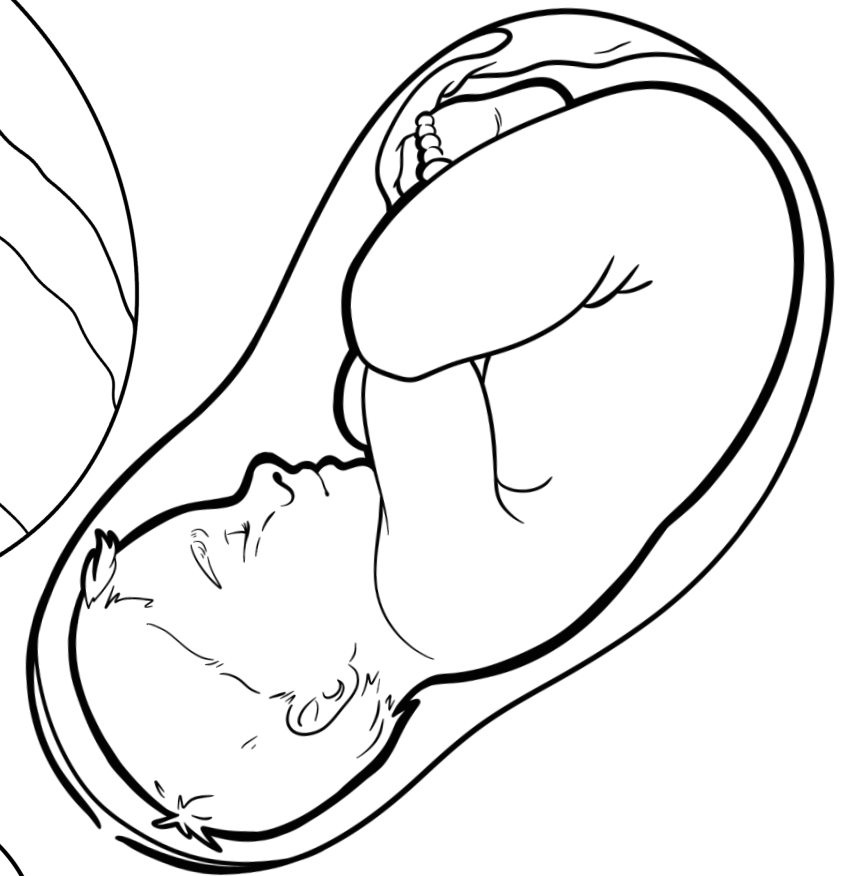

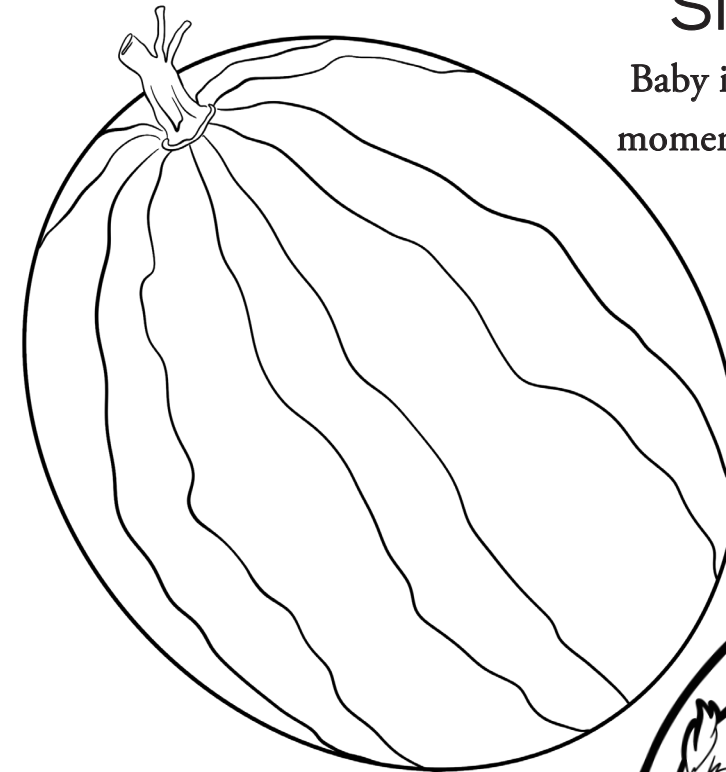

Baby's fingers have nails. He opens and closes his eyes and can make funny faces. His brain is changing and learning very fast.

## 40 Weeks:

Size: Watermelon

Baby is ready! She is waiting for the right moment to make her move into the world.
